

what the world's best photography is made of

Junior Windows Software Engineer

Do you want to make the best software for the world's top photographers?

We are looking for a top-notch junior software engineer to join our world-class software R&D team behind the award-winning Capture One Pro software. As a part of our highly skilled and motivated team, you will work with the newest .NET and WPF technologies in the exciting world of pro photography to bring the best products into the hands of our demanding customers.

Position

You will be an integral part of the Windows software R&D team in Copenhagen. In close cooperation with your colleagues, you will design, implement and maintain Capture One and our other software products. You will have the opportunity to work on many different parts of our software and be involved broadly in the development process. In addition we offer:

- A challenging job at the forefront of technology.
- Innovative international environment with highly skilled colleagues.
- An informal environment with freedom to innovate.
- Great opportunities for personal and professional growth.
- Attractive salary.

Qualifications

As a junior software engineer, we expect that you have graduated recently with top grades and 0-2 years of work experience. You might be the person we are looking for if additionally there is a good match with the following:

- Drive and ability to be best in class.
- Analytic, systematic and thorough with a pragmatic twist.
- Open and communicative with a good sense of quality.
- Self-motivated, hard-working team player with a can do attitude.
- Solid relevant educational background - M.Sc. or Ph.D. from a relevant study.
- Experience with object oriented analysis and design.
- Experience with C#, .NET and WPF is a plus.
- Interest in photography is a plus.
- Proficient in English.

Application

Your application and CV should be emailed to jobs@phaseone.com no later than May 26, 2013. Please mark your email "Junior Windows Software Engineer". For additional information, please contact Application Software Team Leader Jacob Frost on +45 2888 6851.

About Phase One

Phase One is an innovative international company headquartered in Copenhagen Denmark, and with offices in USA, United Kingdom, Germany, China and Japan. Phase One develops digital camera solutions to the professional market within medium format. Phase One also develops 'Capture One', an image processing and workflow software, available for Mac and Windows. Phase One has been the world technology leader since 1993 and has recently announced the IQ280, our second-generation ultra-high resolution 80 megapixel camera. For more info go to: www.phaseone.com
