Results are based on testing in Phase One's testing department. Variation may be expected due to specific camera set up. Battery used for test is new 2500mAh Li+.

1) standby Time will vary a lot depending on temperature, usage of battery and state of the back e.g. Zero Latency will increase power consumption significantly

1) Maximum expected performance. The actual performance will be dependent on the camera model and on the camera and digital back capture modes content is subject to change without notice
