

High-productivity metric camera

# Phase One iXM series

PHASE**ONE**

# iXM series

Phase One iXM cameras are designed for the most demanding mapping, inspection, space and security applications.

All iXM cameras are medium format cameras, based on CMOS sensor, and purpose-built for an easy integration into the most demanding camera systems.

## Wide coverage

The widest possible coverage with high resolution and pixel count to capture incredible details of very large areas.

## High dynamic range

The high dynamic range to capture exceptional details even in the most challenging light conditions boosting productivity.

## Innovative shutter technology

The iXM family provides the most advanced shutter options on the market. The RS Shutters allow for an unbeatable shutter speed rate of 1/2500. To push the limit even further, an electronic global shutter option is also available to reach the fastest shutter speed rate on the market of 1/16.000.

## Build for seamless integration

The iXM's compact size and low weight facilitates effortless integration. By connecting the iXM to GNSS receiver and IMU, precise geolocation of the images are ensured. Plus, taking full control of the camera settings has never been so easy with our comprehensive Software Development Kit.

# Flexible configurations to boost productivity

The iXM family offers flexible configurations to cover a wide range of resolutions to suit your specific need and application from 100 MP all the way up to 280 MP, with both NIR and RGB options.

A wide range of compatible lenses let you choose the optimal lens for your specific mission and operating conditions. Whether you are engaged in aerial mapping,

surveying, environmental monitoring, or infrastructure inspection, Phase One iXM cameras set the highest possible standard for image quality, productivity, and accuracy.

Elevate your imaging capabilities with the iXM camera family and capture the world from above with unparalleled precision and detail.

## About Phase One

Phase One A/S is a leading researcher, developer and manufacturer of medium-and large-format digital cameras and imaging systems. Phase One has pioneered the development of digital photography technology since 1994. The company has developed core imaging technologies and a range of digital cameras and imaging modules, providing the world's highest image quality in terms of resolution, dynamic range, color fidelity and geometric accuracy.

Phase One has grown to become the leading provider of high-end imaging technology across many demanding business segments, such as space imaging, aerial mapping, industrial inspection, and heritage digitization, as well as serving the world's most demanding professional photographers.

Based in Copenhagen, Denmark, and with regional offices in New York, Denver, Cologne, Tel Aviv, Tokyo, Beijing, Shanghai, and Hong Kong, Phase One nurtures long-term relationships with customers, technology partners and its global network of distributors, often playing the role of digital imaging partner to customers with unique requirements. It is with this passion for service that Phase One continually exceeds expectations and drives the imaging industry forward.

IMAGING BEYOND IMAGINATION
