

# XC Camera

Explore. Inspire. Create. Anywhere.

## The Best Image Quality in a Travel Focused Design

The XC Camera emphasizes image quality in a compact camera solution, centered around an intuitive touchscreen interface with easy-to-master operation.

Compose, focus and shoot - it's that simple. The XC is a fully integrated digital travel camera supporting the IQ4 150MP's true medium format sensor and unmatched image quality. Shutter and aperture controls are integrated into the touchscreen for intuitive operation with accurate results, while automatic capture modes are available to ensure you are always ready to capture the ideal exposure, no matter the conditions you face.

The XC seamlessly integrates shutter controls without the need for external power or cables, and incorporates a dual-action shutter button, all of which elevates compact medium format camera designs into the digital age.

### The XC provides:

#### Frame Averaging

An automated tool to achieve the long exposure aesthetic without filters.

#### Automatic Metering

Aperture Value, Time Value and Program modes - unprecedented in a field camera.

#### Mobile Integration

Seamless integration between camera and mobile for easy operation.

#### Compact Integration

The integrated lens and condensed construction provide the best image quality in a hand-held design.

## XC Camera - Variants

### XC 23 IQ4 150MP

The XC 23 is a lens first, camera second. At its core is the Rodenstock HR Digaron-S 23mm f/5.6. The ultra wide-angle of the 23mm is one of the widest possible lenses for full frame medium format. It offers unique and stunning perspectives in every image.

### XC 40 IQ4 150MP

The XC 40 provides a wide-angle perspective within bounds of reality. Built upon the Rodenstock HR Digaron-S 40mm. An essential wide angle lens, built within the XC Camera's compact design delivers a versatile interpretation of almost any composition.

## Dedicated To Exploration

For photographers on the move, the XC Camera provides intuitive integration and features to keep your creativity focused and camera bag light.

### WiFi

Extend your workflow, flexibility and functionality via Capture One or future Mobile App connected on any device.

### Power Management

Always stay powered with the ability to charge the internal battery via a USB-C connected power bank.

### IQ Styles

Adopt your own bespoke style settings via IQ Styles, to preview your final aesthetic in the field.

### ETTR

Easily capture perfectly exposed images with all the available light in a scene without any set up, ensuring you never miss the shot.
