

Phase One strengthens distribution network with DroneStars for Enhanced UAV Inspection in the Benelux region

Copenhagen, Denmark, February 6th, 2025 – Phase One, a global leader in digital imaging technology, is proud to announce a new partnership with DroneStars, a leading unmanned technology provider. This collaboration enhances accessibility to the Phase One P3 payload for customers throughout Belgium, the Netherlands, and Luxembourg.

"We are thrilled to partner with DroneStars to bring our Phase One P3 payload to customers in the Benelux region," said Nessim Djebbar, Sales Manager EMEA at Phase One. "This partnership represents a shared commitment to innovation and excellence, ensuring that UAV operators in the region have access to the tools they need to achieve unparalleled precision and efficiency in their inspection missions."

"At DroneStars, we are dedicated to providing our customers with cutting-edge UAV solutions. Partnering with Phase One allows us to offer unparalleled imaging capabilities with the P3 payload to clients across the Benelux region," said Rob Tiebie, co-owner at DroneStars. "This collaboration aligns perfectly with our mission to empower UAV operators with the best tools to drive innovation and precision in their operations."

Phase One P3 Payload for unmatched productivity

Phase One P3 is designed to maximize the productivity of the most demanding inspection projects where time, safety, and image details are paramount for success. Ready-for-flight with DJI M300/M350 and ready-for-integration with MAVLink drones, the P3 boosts your inspection productivity through its ease of installation, superior data output, and uncompromised image details. Featuring a medium-format Phase One iXM camera with a sensor 1.7 times larger than other cameras, the P3 excels at capturing more details in each frame also under challenging lighting conditions.

Phase One P3 ensures:

- Superior image quality capturing sharp detailed images in any environments including challenging and high contrast environments, enhancing the value of collected data and minimizing the risk of re-flights.
- Superior efficiency by registering entire assets with a minimum of images taken, data processing is faster empowering customers to take informed decisions quicker.
- Superior safety enabling to capture sub-mm-details of complex structures from a safe distance.

About Phase One

Phase One is a global leader in digital imaging technology, providing unrivaled imaging quality for a wide range of applications including professional photography, heritage digitization, industrial inspections, aerial mapping, security, and space. For more than three decades, Phase One has developed core imaging technologies and a range of digital cameras and imaging modules, setting new standards for image quality in terms of resolution, dynamic range, color fidelity, and geometric accuracy. Based in Copenhagen, Denmark, Phase One has regional offices strategically located in Denver, Tel Aviv, Tokyo, Saku, Shanghai and Hong Kong.

Supported by a global sales network, the company nurtures long-term relationships with customers, technology partners, and distributors worldwide, often acting as digital imaging partner to customers with unique requirements. This passion for service ensures Phase One continually exceeds expectations and drives the imaging industry forward.

We deliver Imaging Beyond Imagination.

About DroneStars

Analysis, advice, drones, training, manuals, inspections, software, and implementation support—DroneStars offers it all. Our mission is to seamlessly and safely integrate drones into business services, industry, and government, directly contributing to our clients' success. We stand by our motto: we say what we do and do what we say. No small print, no hidden agendas—just honest and sincere advice tailored to your specific needs. It is no coincidence that a significant portion of our clientele consists of government agencies, where integrity and quality are paramount.

By staying true to our mission, DroneStars has grown to become the largest DJI Enterprise dealer in the Benelux since 2023. We are a one-stop-shop with unparalleled expertise and the best service. Reliability, agility, solution-oriented thinking, quality, and service define our core values. We hold ourselves to the highest standards, offering only products and services that meet our strict requirements for performance and reliability.

As a strategic enterprise dealer of DJI, the world leader in drone technology, and an official distributor of Phase One, a pioneer in high-resolution imaging, we provide cutting-edge solutions for aerial inspections, mapping, and industrial applications. The Phase One P3 Payload, equipped with the powerful iXM-120MP camera, delivers unprecedented image quality, enabling precise and efficient inspections of critical infrastructure, power lines, wind turbines, and more. By continuously evolving and integrating application-driven solutions, we ensure that you always have access to the latest advancements in drone and imaging technology.
